

As a student, I want to be able to record my time usage.

- As a user, I want to type “today 09:30 10:30 ‘studied Java’ :STUDY” (DATE FROM TO TASK TAG format) as an input to make a record and store it in the database.
- As a user, I want to type DATE and have all the activities associated with the date displayed.
- As a user, I want to type TASK and have all activities associated with the task displayed.
- As a user, I want to type TAG and have all activities associated with the tag displayed.

As a student, I want to generate a time usage report for a specified date range.

- As a user, I want to input a 'from DATE' and 'to DATE' and have it report all activities between those dates.

As a student, I want to know which activities I spend most of my time on.

- As as user, I want to input 'priority' and the system provide a list on activities with most time consumption.
